

Georgia Coastal Ecosystems LTER

Member of the NSF Long Term Ecological Research Network

GCE LTER Schoolyard Program

Interest Notification Form

<https://gce-schoolyard.uga.edu>

The **Georgia Coastal Ecosystems Long Term Ecological Research Program** (GCE-LTER) is an NSF-sponsored project that studies how long-term changes caused by climate change, sea level rise, and human alterations of the landscape affect coastal ecosystems. The **GCE-LTER Schoolyard Program** provides critical in-service training for k-12 educators in field ecology, immersing science and math teachers in hands-on research activities in the field to enable them to transfer these experiences back to the classroom with a focus on science processes.

If you would like to be notified of future Schoolyard Teacher Workshop dates, send an email with the following information to Venetia Butler at venetiabutler@bellsouth.net
